-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6, 9, and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Matsuoka et al (US-6740921).

Matsuoka et al discloses an information storage medium comprising a substrate (9), a plurality of lower electrode lines (701, 7) and a plurality of upper electrode (802, 8), and an information layer having cells arranged in matrix and located at each crossing region of the lower electrode lines and the upper electrode lines.

In re claim 2, Matsuoka discloses a phase change layer (202, 2)

In re claim 6, Matsuoka discloses an oxide layer (3) and a transistor (1).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuoka et al (US-6740921) in view of Formigoni et al (US-4795657).

Matsuoka discloses all the subject matter discussed above. Formigoni further teaches that the electrode in the storage device can be transparent. Note lines 63-68, column 1 of Formigoni. Therefore, it would have been obvious to one of ordinary skill in the art to use transparent electrode in Matsuoka's device as taught by Formigoni.

The other references are cited to show other structures pertinent to Applicants' disclosure.
